

Application mobile

Objectifs

Le principal objectif est d'arriver un mois avant le convent avec une application répondant aux besoins immédiats des utilisateurs. Elle doit être dans un premier temps impérativement stable et compatible avec un maximum de périphériques.

Pour le mois d'Octobre, toutes les features suivantes doivent être présentes :

- Génération d'une carte virtuelle remplaçant la carte plastifiée
- Affichage de la loge principale et affiliation et liste des membres avec possibilités de prise de contact immédiat
- Affichage de l'historique maçonnique
- Affichage des événements de loge à venir
- Géolocalisation
- Possibilité pour le GS d'envoyer un message à tous les utilisateurs de l'appli (sous forme d'alerte)
- ?

Diagramme de suivi

Définition des éléments :

- **Développement d'une feature** : définit la phase de réflexion, mise en place et test de la feature
- **Corrections de bugs** : définit la période où Olivier et moi testons, analysons et corrigeons d'éventuels bugs
- **Recette** : définit une réunion dans laquelle nous validons tous le bon fonctionnement avant communication
- **Release** : communication faite aux utilisateurs de l'update d'une version, avec les nouvelles features
- **Feature** : fonction souhaitée à définir en réunion
